

Prashanth Algottu

📱 Android Developer | 🤖 **Generative AI Enthusiast** | **ML/LLM Engineer in Transition**

📍 Hyderabad, India | ✉️ chinnuprashanth868@gmail.com | 🔗 www.linkedin.com/in/prashanth-GenAI | 💻 <https://github.com/chinnuprashanth868-blip>

Professional Summary

Android Developer with 3.7 years of experience in building scalable mobile applications and strong expertise in Java, Kotlin, and Android SDK. Currently transitioning into Generative AI / Machine Learning, with hands-on experience in Python, ML algorithms, LLMs, Hugging Face, LangChain, and RAG pipelines. Skilled in designing and deploying AI-powered solutions with a passion for combining mobile development expertise with modern AI technologies.

Core Skills

- Programming & Tools: Python, Java, Kotlin, NumPy, Pandas, Matplotlib, Scikit-learn
- ML/DL: Linear & Logistic Regression, ANN, Word Embeddings, Word2Vec, CNN, RNN
- Generative AI: LLMs (OpenAI, Hugging Face), LangChain, LangChain Agents, RAG Pipelines, Prompt Engineering
- Databases & Infra: PostgreSQL, MongoDB, Vector DBs (FAISS/Chroma)
- Mobile Development: Android SDK, MVVM/MVP, Retrofit, Firebase, Jetpack Components
- Version Control: Git, GitHub, GitLab

Professional Experience

Tectoro Consulting Pvt Ltd – Hyderabad, India

Android Developer | Jan 2022 – Present

- Designed and developed secure Android applications for enterprise clients using MVVM architecture.
- Built modules for remote management systems enabling control of Android TVs and IFP devices.
- Implemented Kiosk Lockdown and App Management features to restrict unauthorized usage.
- Collaborated with OEM teams to integrate hardware and software key controls.
- Led efforts to create reusable libraries (.aar) and Flutter modules for cross-project integrations.
- AI Contribution: Researched on-device ML models for biometric and security use cases.

Generative AI / ML Projects (Independent & Portfolio)

- RAG-based Chatbot with LangChain & Hugging Face: Built an end-to-end chatbot using LLMs, integrated with FAISS vector database for semantic search, enabling context-aware responses from custom documents.
- LLM Agent for Task Automation: Developed an autonomous AI agent with LangChain to perform multi-step tasks like data retrieval, summarization, and report generation.
- Face Recognition-based Login & Attendance System: Implemented ANN-based face recognition pipeline with embeddings storage and real-time verification, packaged into an Android app.
- Text Classification with Word2Vec + Logistic Regression: Built a spam classifier using Word Embeddings + traditional ML models, achieving high accuracy on benchmark datasets.

Education

Bachelor of Technology (B.Tech) – Civil Engineering

CMR Technical Campus, 2020

Certifications

- Android Enterprise Certified Professional
- Android Enterprise Certified Associate
- (Optional: Add ML/AI course certificates – Coursera/DeepLearning.AI/Stanford if you have)
